

# WHAT CAN WE DO ON SNOW DAYS?!

Bonjour families of 4/3 C students,

I thought I would send along some ideas for learning activities that your children can participate in when it is a snow day!

If you have internet access:

1. Students may go on Zorbit Math- each student has their username and password.
2. [www.abcya.com](http://www.abcya.com) has a lot of math games for students.
3. <http://jelis.rkpublishing.com/student/> is an online reading programs which all students have username and password.

Activities without internet:

1. Reading the French or English book the child has brought home for 20 minutes.
2. Practice multiplication facts 0-10 any way you can (even making groups of snowballs!).
3. Strategy boardgames (i.e. monopoly or cards)
4. Play outside for 30 minutes to get fresh air and exercise!

If any of these activities are completed, be sure to write them in agenda. Each activity that is completed, students will earn a ticket for our weekly draw!

Thank you for the continued support of your child's learning!  
Mlle. Gallant
